

# Men's Health and Wellbeing Bibliography

Completed as part of a student placement with the Canterbury Men's Centre by Silas Thielmann

**Note\*** Items in bold type face indicate the research was male specific

Updated October 2010

## About this Bibliography:

It is our intention that this will become a living document that continues to be added to. Therefore we encourage possible contributions of both, references as well as subject headings.

The criteria for this bibliography are simply that the research is preferably focused on men and if not considering men as a research subjects. Furthermore the research is either about New Zealand or New Zealand research.

References are based on the newly published 6th edition of the publication manual of the American Psychological Association (APA) (2010). We would appreciate if references could be sent in this format if the contributors are comfortable with this manual. If not the internet link will suffice.

Please email any suggestions to Donald Pettitt: [Donald@canmen.org.nz](mailto:Donald@canmen.org.nz)

# Addiction:

## Smoking
